INSTALLATION TEMPLATE

Accessories

T001

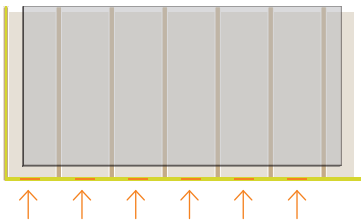
Installation template for horizontal trim

Technical specifications

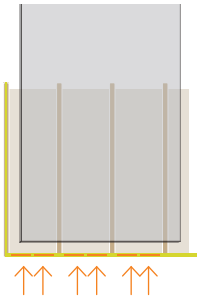
Tool to assist in the installation of fiber cement panels on horizontal trims. This tool is used as a guide to maintain the 1/4" spacing between the panel and the trim during installation. It enables you to comply with the installation standards recommended by the manufacturers and to maintain the general symmetry of the project. Exclusively designed for trims H001, H001XL, H100, H002, H002XL, H760XL and S002.

User Manual

1

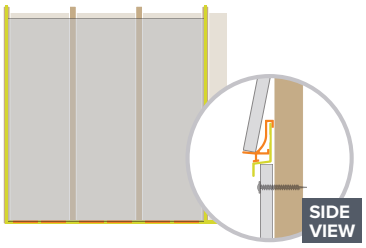


For **horizontal** panels, place a template on the trim between each lath (every 16 inches).



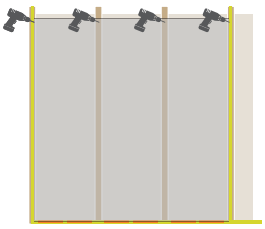
For **vertical** panels, place two templates between each lath.

2



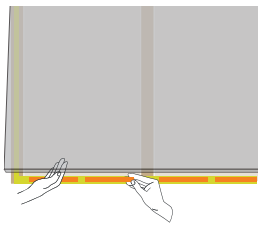
Place the panel on the templates.

3



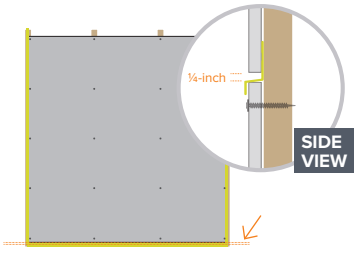
Screw top of panel.

4



To remove the templates, gently pull on the panel.

5



Complete screwing.

¼-inch spacing between the panel and the horizontal trim is perfectly maintained.

* Recommended for fiber cement panel with CLIP! vertical trim installation (J002, J109, J760XL, C004XL, V920, V920XL, V099, V199, C994, C924XL and V299XL).
